

Business Solutions

Brammer, a pan-European engineering organisation, has 265 locations in 11 countries. Before e2train's solution, staff in different locations often had multiple log-ins and different points of access to their learning. Also, business groups in different locations all tracked and stored training information locally, which meant that monitoring and reporting on training was time consuming and fragmented. e2train's Kallidus LMS was installed on one of Brammer's servers in one central location for access by its 2,000 staff throughout Europe. Now Brammer's training information is consolidated in one location and one common system, making tracking and reporting more accessible and a faster task to complete.

About e2train Business Solutions

All organisations regardless of size, industry or location, face demands to improve efficiencies and increase their effectiveness. e2train can help you deliver this additional value by providing solutions that address your specific business needs:

Roll-out new software and processes

- Easily create software simulations and roll-out organisation wide
- Provide quick and economic training to meet demand
- Decrease adoption time for new software systems and processes
- Minimise the impact of change on overall business performance

Meet regulatory compliance demands

- Track and report on all required training
- Monitor non-compliance and address shortfalls immediately
- Ensure rapid responses to audit requests

Improve ROI and reduce training costs

- Automate training performance reviews
- Justify training expenditure through comprehensive reporting and tracking
- Deploy large volumes of training quickly and effectively

Launch new products and services

- Train many people in different locations simultaneously
- Avoid out-of-office time for training
- Provide informal learning resources for on-demand information
- Ensure consistent communication messages

Consolidate training records and data

- Reduce paper-based administration
- Access data from one central location
- Report on conglomerated data in a simple view

Manage skills and competencies

- Create organisation-specific skills and competencies
- Link these to business objectives and training opportunities
- Drive business performance through personal development

Increase sales force readiness

- Easily address underlying performance issues
- Minimise out-of-office time for training
- Reduce time-to-market for new products and services
- Ensure consistent delivery of messages

Deliver employee induction

- Ensure new staff receive direction and guidance
- Communicate organisational messages clearly and effectively
- Provide access to support materials and on-demand information

Create corporate universities

- Create a powerful learning culture within the organisation
- Align learning with strategic business objectives
- Centralise learning resources

Industry Solutions

About e2train Industry Solutions

e2train provides learning solutions to over 100 customers across more than 19 different countries and a range of industries and vertical market sectors. Every industry or market has specific traits and subtle differences that make it unique.

Automotive and Transport

- Deliver training consistently across many dealers
- Quickly fill skills gaps to combat high staff turnover

Financial Services

- Report on, and track training for, FSA regulatory compliance
- Ensure smooth roll-out of new financial products and changes across multiple locations within short timescales

Telecommunications

- Provide constant stream of refresher training for new devices and technologies
- Meet industry compliance regulations

NHS and Medical

- Integrate with existing NHS systems such as ESR
- Deliver training 24 x 7

Government

- Provide highly secure training environment, protecting data against leaks and loss
- Train learners on diverse and highly specific subject matter

Local Authorities

- Train diverse range of staff including those without regular access to PCs
- Deliver mandatory training quickly and cost effectively
- Eliminate the administrative burden associated with PDR performance reviews

Retail

- Overcome difficulties in training store staff on new products and processes within short timescales
- Deliver training 24 x 7 over widely dispersed store locations
- Ensure the delivery of training is consistent throughout all stores

Business Training Providers

- Kallidus provides a broad range of features and functions to meet the diverse needs of different organisations
- Easy to use interface increases usage opportunities

Non-Profit Organisation

- Implement e-learning whilst minimising ongoing training costs
- Develop cost effective bespoke e-learning by cross skilling classroom trainers

Legal and Professional Services

- Track CPD points within the LMS for both e-learning and classroom training
- Reduce costly administrative burdens associated with training and compliance via reporting and automation of training requests

Engineering

- Ensure health and safety training is actively delivered and recorded
- Train staff worldwide in multiple languages easily and effectively

Practical application

e2train's industry solutions provide practical answers to training challenges shared by numerous organisations within an industry. They have been built from practical experience and the shared knowledge acquired by vertical sector expertise.

Products and Services

About e2train Solution Services

e2train's best practice approach to creating learning solutions combines leading software with hands-on experience across a range of industries and market sectors. From small scale, 'off-the-shelf' solutions to multi-national, multi-lingual systems, e2train can develop a tailored solution that suits your needs.

How we do it	Description
<p>Kallidus Learning Suite</p> 	<p>e2train's Kallidus Learning Suite provides a scaleable system that is intuitive, flexible and represents best value for money.
